

syncPoS Pages and Menu Reference

This document describes the visible pages, left-side main menus, top submenus, and access permissions currently implemented in syncPoS.

Access Model

The admin UI uses role-based permissions. A user sees only the main menus and submenus allowed by their assigned role permissions. Direct page access is also guarded on the server for protected pages.

Permission	Purpose
`all:all:all`	Full access to every module.
`catalog:products:view`	View product catalog pages.
`catalog:products:manage`	Create, update, delete, and restore product catalog records.
`partners:partners:view`	View customers, suppliers, and payment terms.
`partners:partners:manage`	Create, update, delete, and restore partner records.
`inventory:stock:view`	View inventory, stock cards, serial history, transfers, and operations.
`inventory:stock:receive`	Post stock operations, purchases, receipts, adjustments, opening stock, and returns.
`inventory:locations:manage`	Manage warehouse and shop locations.
`sales:orders:create`	Access sales order, delivery, invoice, payment, and return flows.
`reports:profit:view`	View dashboard and detailed reports.
`company:settings:manage`	Manage payment configuration, expenses, and company-level operational settings.
`iam:users:view`	View users.
`iam:users:manage`	Create, edit, disable, and unlock users.
`iam:roles:view`	View roles and permissions.
`iam:roles:manage`	Create, edit, and delete roles.

Public and Auth Pages

Page	Route	Purpose
Landing page	`/`	Public professional landing page for syncPoS. Introduces the retail management system and links users into the app.
Login	`/login`	User sign-in page. Tracks failed login attempts and temporarily locks accounts after repeated failures.
Unauthorized	`/unauthorized`	Access denied page shown when a signed-in user lacks the required permission.

Admin Shell

Area	Purpose
Left sidebar	Main module navigation: Dashboard, Products, Partners, Purchasing, Sales, Inventory, Reports, Settings, Operations. Items are hidden when the user lacks permission.
Top submenu	Shows submenus for the active module, similar to Odoo. Submenu items are also permission-filtered.
Sign out area	Shows sync status, current username, and the sign out button.

Dashboard

Required permission: `reports:profit:view`

Menu	Route	Purpose
---	---	---

Overview	`/admin`	Main operations dashboard. Shows sales, payments, expenses, supplier payments, receivables, payables, stock value, pending purchases, low stock, payment account summary, and recent activity.
Daily Activity	`/admin?view=daily`	Reserved dashboard view for daily operational activity. Currently routed through the dashboard menu.
Sync Status	`/admin?view=sync`	Reserved dashboard view for sync/offline status. Currently routed through the dashboard menu.

Products

Required view permission: `catalog:products:view`

Manage actions require: `catalog:products:manage`

Menu	Route	Purpose
Products	`/admin/products`	Product list with filters and product detail access.
New Product	`/admin/products/new`	Create product with Odoo-like form tabs. Supports catalog data, pricing, tracking mode, attributes, compatibility, and taxes.
Product Detail	`/admin/products/[id]`	View product detail, stock/tracking context, and related information.
Edit Product	`/admin/products/[id]/edit`	Edit the same product form used for create.
Categories	`/admin/products/categories`	Manage product categories in popup forms.
Brands	`/admin/products/brands`	Manage product brands in popup forms.
Units	`/admin/products/units`	Manage units of measure in popup forms.
Taxes	`/admin/products/taxes`	Configure tax name, rate, active status, and tax metadata. Taxes are reused in purchase and sales order lines.
Price Lists	`/admin/products/price-lists`	View/manage price lists and product prices.
Lots / Serials	`/admin/products/tracking`	View serial/lot tracking information for tracked products.

Partners

Required view permission: `partners:partners:view`

Manage actions require: `partners:partners:manage`

Menu	Route	Purpose
All Partners	`/admin/partners`	Partner list for customers, suppliers, or both.
Customers	`/admin/partners?role=customer`	Customer-filtered partner list.
Suppliers	`/admin/partners?role=supplier`	Supplier-filtered partner list.
New Partner	`/admin/partners/new`	Create customer/supplier partner.
Edit Partner	`/admin/partners/[id]/edit`	Edit partner profile, contact, address, and flags.
Payment Terms	`/admin/partners/payment-terms`	Manage payment term records using text-based terms.

Purchasing

Required permission: `inventory:stock:receive`

Menu	Route	Purpose
RFQs / Orders	`/admin/purchasing`	Purchase order list. Covers RFQ/draft, confirmed purchase order, received status, and related document counts.

| New RFQ | `/admin/purchasing/new` | Create a purchase order using an Odoo-like form with notebook order lines. Supports many order lines and many taxes per line. |

| Purchase Detail | `/admin/purchasing/[id]` | Edit draft purchase orders, confirm orders, receive products, and open smart buttons for receipts, vendor bills, landed costs, payments, and returns. |

| Receipts | `/admin/purchasing?view=receipts` | List purchase receipts separately from purchase orders. |

| Receipt Detail | `/admin/purchasing/receipts/[id]` | View/post receipt details. Serial and lot assignment happens during receipt. |

| Landed Costs | `/admin/purchasing?view=landed-costs` | List landed cost documents. |

| New Landed Cost | `/admin/purchasing/landed-costs/new` | Create landed cost linked to receipt or purchase order. |

| Landed Cost Detail | `/admin/purchasing/landed-costs/[id]` | View landed cost allocation preview and posted result. |

| Vendor Bills | `/admin/purchasing?view=supplier-bills` | List vendor bills separately from purchase order pages. Shows products, taxes, totals, residual amount, and payment status. |

| Vendor Bill Detail | `/admin/purchasing/vendor-bills/[source]/[id]` | View vendor bill details and register supplier payment. |

| Payments | `/admin/purchasing?view=payments` | List outbound supplier payments. |

| Supplier Payment Detail | `/admin/purchasing/payments/[id]` | View, post, or cancel supplier payment document. |

| Returns | `/admin/purchasing?view=returns` | List supplier return documents. |

| New Supplier Return | `/admin/purchasing/returns/new` | Start supplier return from a posted purchase receipt. |

| Supplier Return Detail | `/admin/purchasing/returns/[id]` | View/post supplier return document. |

Sales

Required permission: `sales:orders:create`

Menu	Route	Purpose
Quotations / Orders	/admin/sales	Sales quotation/order list. Shows customer, status, delivery/invoice/payment progress, products, and totals.
New Quotation	/admin/sales/new	Create a sales quotation using the shared Odoo-like order form and notebook lines.
Sales Order Detail	/admin/sales/[id]	Edit draft quotation, confirm quotation, create delivery, create invoice, and use smart buttons for related documents.
Deliveries	/admin/sales?view=deliveries	List customer delivery documents.
Delivery Detail	/admin/sales/deliveries/[id]	View/post/cancel delivery. Delivery reduces stock and updates serial status.
Invoices	/admin/sales?view=invoices	List customer invoices with residual and payment status.
Customer Invoice Detail	/admin/sales/invoices/[id]	View/post invoice and register inbound customer payment.
Payments	/admin/sales?view=payments	List inbound customer payments.
Customer Payment Detail	/admin/sales/payments/[id]	View/post/cancel customer payment document.
Returns	/admin/sales?view=returns	List customer returns.
New Customer Return	/admin/sales/returns/new	Start customer return from original sales order.
Customer Return Detail	/admin/sales/returns/[id]	View/post customer return and related refund placeholder data.

Inventory

Required view permission: `inventory:stock:view`

Posting/operation actions require: `inventory:stock:receive`

Location management requires: `inventory:locations:manage`

Menu	Route	Purpose
Stock	`/admin/inventory`	Stock by location summary with product, location, quantity, serial/lot, and cost visibility.
Operations	`/admin/inventory/operations`	Inventory operation list covering receipts, deliveries, adjustments, scrap, and returns.
New Operation	`/admin/inventory/operations/new`	Create document-based inventory operation.
Operation Detail	`/admin/inventory/operations/[id]`	View/post inventory operation and movement lines.
Receipts	`/admin/inventory/operations?view=receipts`	Inventory operation filter for incoming receipts.
Deliveries	`/admin/inventory/operations?view=deliveries`	Inventory operation filter for outgoing deliveries.
Transfers	`/admin/inventory/transfers`	Transfer list for moving stock between locations.
New Transfer	`/admin/inventory/transfers/new`	Create transfer with source, transit, and destination locations.
Transfer Detail	`/admin/inventory/transfers/[id]`	Approve, dispatch, receive, and handle transfer discrepancies.
Adjustments	`/admin/inventory/operations?view=adjustments`	Inventory operation filter for stock adjustments.
Scrap	`/admin/inventory/operations?view=scrap`	Inventory operation filter for scrapped stock.
Returns	`/admin/inventory/operations?view=returns`	Inventory operation filter for customer/supplier returns.
Stock Card	`/admin/inventory/stock-card`	Product ledger report showing stock movement history.
Serial History	`/admin/inventory/serial-history`	Serial/lot history and current status/location.
Locations	`/admin/inventory/locations`	Manage warehouses, shops, transit, supplier, customer, and scrap locations.
Opening Stock	`/admin/inventory/opening-stock`	CSV/Excel-style opening stock import with validation preview and audit trail.
Opening Stock Template	`/admin/inventory/opening-stock/template`	Downloads the import template.

Reports

Required permission: `reports:profit:view`

Menu	Route	Purpose
Report Hub	`/admin/reports`	Central page for detailed report links.
Sales	`/admin/reports/sales`	Sales report by date/customer/document with totals.
Expenses	`/admin/reports/expenses`	Expense report by category, date, payment account, and status.
Payment Accounts	`/admin/reports/payment-accounts`	Bank/cash/mobile/card transaction summary and account movement detail.
Stock	`/admin/reports/stock`	Stock valuation and stock availability report.
Receivables	`/admin/reports/receivables`	Customer invoice residual balances and payment status.
Payables	`/admin/reports/payables`	Vendor bill residual balances and payment status.

Settings

Settings menus are permission-filtered. Users and Roles have separate view and manage permissions.

Menu	Route	Purpose	Permission
Users	`/admin/settings?view=users`	View users, employee links, roles, login status, failed attempts, lock state, and last login.	`iam:users:view`
New/Edit User	Popup on Users page	Create/update username, email, employee link, password, status, email verified flag, and assigned roles.	`iam:users:manage`
Disable/Unlock User	Actions on Users page	Disable user login or unlock/reset failed login status.	`iam:users:manage`
Roles	`/admin/settings?view=roles`	View role code, name, flags, user count, permission count, and active status.	`iam:roles:view`
New/Edit Role	Popup on Roles page	Create/update role metadata and assign permissions using many-to-many tags.	`iam:roles:manage`
Delete Role	Action on Roles page	Soft-delete custom deletable roles. Protected roles cannot be deleted.	`iam:roles:manage`
Permissions	`/admin/settings?view=permissions`	View permission catalog with application, feature, action, status, and description.	`iam:roles:view`
Payments	`/admin/settings/payments`	Configure payment methods and payment accounts for cash, bank transfer, mobile money, and card usage.	`company:settings:manage`

Operations

Required permission: `company:settings:manage`

Menu	Route	Purpose
Tasks	`/admin/operations`	Operations workspace. Currently links to expense registration and reserves space for approval queues.
Approvals	`/admin/operations?view=approvals`	Reserved approval queue view.
Expenses	`/admin/operations/expenses`	List business expenses that do not increase inventory value.
New Expense	`/admin/operations/expenses/new`	Register paid or unpaid expense with category, payment status, optional employee/vendor/location, and notes.
Expense Detail	`/admin/operations/expenses/[id]`	View expense, register payment later, and track status.
Expense Categories	`/admin/operations/expenses/categories`	Manage reusable expense categories.

Important Navigation Notes

- The left sidebar uses the active user's permissions to decide which modules are shown.
- The top submenu uses the same permissions to decide which page links are shown.
- Hidden menu items are not the only protection. Important pages and server actions also call permission checks.
- Some planned views are present as menu routes but are not yet full independent pages, such as dashboard daily activity, dashboard sync status, and operations approvals.
- `Settings / Users` and `Settings / Roles` separate viewing from management. A user can be allowed to inspect records without being allowed to edit them.

Suggested Future Permission Improvements

The current permission model is usable, but still coarse in some business areas. For production-grade control, consider adding:

Future Permission	Purpose
-------------------	---------

```
| --- | --- |
| `sales:orders:view` | View sales without creating or editing. |
| `sales:deliveries:manage` | Post/cancel customer deliveries separately from
sales order creation. |
| `sales:invoices:manage` | Create/post customer invoices. |
| `sales:payments:manage` | Register/post customer payments. |
| `purchasing:orders:view` | View purchasing without receiving or posting. |
| `purchasing:orders:manage` | Create/confirm purchase orders. |
| `purchasing:bills:manage` | Create/post vendor bills. |
| `purchasing:payments:manage` | Register/post supplier payments. |
| `expenses:view` | View expenses without managing company settings. |
| `expenses:manage` | Create, edit, cancel, and pay expenses. |
| `reports:financial:view` | View financial reports separately from operational
reports. |
| `inventory:valuation:view` | View stock cost/value fields separately from
physical stock quantities. |
```
